Introducing the Booster Seat Buddy!

Getting your little ones buckled in their booster seats isn't easy. Kids want to do it themselves—but it's too big a job for such little hands. And for parents it can be a painful stretch and a real struggle. Well not anymore! Booster Seat Buddy is a quick snap mounted seatbelt stabilizer that makes buckling a breeze! It's so easy that **ALL** booster seat kids can do it themselves. The Booster Seat Buddy mounts directly onto your booster seat. It takes just minutes to do—and the positive buckling and unbuckling assistance will last as long as your kids are booster seat kids! And it's easy to remove your booster seat to clean, or to use in another vehicle. The Booster Seat Buddy provides more independence for bigger booster seat kids and more convenience for parents of all booster seat kids!

Installation is easy! It's a one time setup and after that, removal and installation of the booster seat is as easy as buckling and un-buckling the quick release buckle. This allows for easy movement from one vehicle to another without the need for tools.
